INCOME TAX AMENDMENTS.

A Few Changes Proposed by the Senate

Washington, June 21.—Senator Vest

Another amendment requires the in-

Another amendment requires the internal revenue commissioner to prescribe the form of the affirmation or eath required from the president or which officer of a corporation or company in giving the net proceeds of his company. In the paragraph relating to these returns by corporations there is a change which provides a punalty for refusing to make returns instead of for refusing to pay the penalties, which is evidently the correction of an incon-

fusing to make returns instead of for re-fusing to pay the penalties, which is evidently the correction of an incon-gruty in the former print.

Another amendment exempts frater-nal beneficiary socioties, orders, or asso-ciations operating upon the lodge system and which provide for the payment of life, sick, accident and other benefits to the members of such societies and their dependents, from the operations of the law.

An exemption is also made in the case

of such saving banks, saving institutions or societies as have no stockholders or

members except depositors and no capital except deposits; those that shall not receive deposits to an aggregate amount in any one year of more than \$1,000 from the same depositor; those that shall not allow an aggregate amount in the same depositor; those that shall not allow an aggregate the same depositor; those that shall not allow an aggregate the same depositor.

not allow an accumulation of cooling deposits by any one depositor exceeding \$10,000; those that shall actually divide

and distribute to their depositors, ratably to deposits, all the earnings over the necessary and proper expenses of such bank, institution or society, except such

tank, institution or sourcy, except such as shall be applied to surplus; and also those who shall not possess in any form a surples fund exceeding 10 per cent of the aggregate deposits.

Escape.
Ala., June 21,—Fire BIRMINGHAM, broke out in the May Lee coal mine, 10 miles from here, yestorday, outting off

broke out in the May Lee coal mine, 10 miles from here, yesturday, outning off 50 men from escape, who were working in the rear part of the mine. The imprisoned men made a dash for the opening, rushing through fire, snoke and flames. Four of the number were taken out dead. Their names are: John Whalen, superntendent of the mine; G. W. Baskins, William McKensie and an unknown white man.

When it was known that the mine was on fire the 50 men who were imprisoned began making efforts to escape. The greater part of them were leaded into the transcars, which were drawn through the flames and snoke by means of wire cables as rapidly as possible. Others took their chances in making a dash through the smoke. Some got out alive, while others were less fortunate and fluiteims to the smoke and fire. Among the latter was Superintendent Whalen, who was practated and died just as he was brought out.

The work of rescue went on for several hours, and by durk every man who was alive bad been taken out of the mines. Many of those brought out in the transcurs were suffocated, as the cars had, of necessity, to be drawn right through the smoke that filled the mine.

A number of physicians were at the mouth of the pit, as was also the entire population of the town of Lewisburg, Mothers, wives and children were wild with grief, and it was with the greatest difficulty that they were restrained from dashing into the burning mine in an effort to rescue their leved ones. As rapidly as the suffucated triners were brought out they were taken in hand by physicians and efforts made to revive them. Four died from smidocation. The ethers who were prestrated will, it is thought, recover.

The administrative features of the bill (Sections 23 to 48 inclusive) were stricken out, as Mr. Jones explained, in order to facilitate the passage of the bill. If it was deemed advisable later to enset the proposed administrative sections, it could be done in a separate bill, he added. Mr. Allison intimated that it was the wish of the secretary of the

thought, recover.

It is believed that all the men have th is believed that all the men have been accounted for, though later investigation may show further fatalities. The owners of the mine are positive that it was set on fire. This mine has recently started up with new theor, having been closed down previous to that on account of the stude. There is no clow as to the incendiaries.

The fire in the mine is still raging at a furious rate. The fire department from Birmingham has been sent to the place, and are now fighting the flames. The fire began in a lot of refuse coal where no work was being done. It was directly in the manway, and had not one of the men working in the mine discovered it before it had guined great headway, not one of the 50 minors would

5 per cent.

At 4:10 the senate went into executive session, and at 4:18 adjourned.

covered it before it mad gamed great headway, not one of the 50 miners would have escaped alive. The early discovery headway, not one of the 50 minors would have escaped alive. The early discovery of the flames onabled many to escape by rauning through the smoke. Those working for back in the mine were notified as quickly as possible, but when they arrived at the fire they could not pass and it was then that they were leaded in trancars and drawn through the smoke and clames. yesterday introduced the amondments which he amounteed heretofore would be offered by the finance committee to the income tax provisions before that part of the tariff bill was reached.

The first of the amoudments provides that nutual life insurance companies shall not be required to pay an income tax upon the sums repaid to their policy holder as divident's or interest upon the surplus premiums held by such companies. the smoke and flames.

The pichu-cuats matches the worst A week ago he returned to Washington from Kausas, and since then has been suffering from bowel trouble, but until Tuesday night standfastly refused to call a physician During the night he bee, me worse, and Dr. Brumbaugh, the family physician, was called in. He pronounced the article cholera morbus. most dangerous—but, inckily, he is the rarest. He is the only true asp on this continent and in the United States is ever found outside of New Mexico and Arizona, , That he was also known to the ancient Mexicans 1, apparent from his name pichu-coatl, an Aztec word, pronounced the attack cholera morbus. The ex-senator passed a quiet night. No serious alarm was felt during the day until 3 o'clock yesterday afternoon, when the symptoms grew much worse. Doctors Sowers and Balloch were hashly summoned. Their efforts to affer of relef proved futile. He sank rapidly and at 4 o'clock passed away.

No arrangements have yet been made for the funeral, though the remains which was brought up to our territory

Aire. I was out hunting jack rabbits, in company with some Indian friends, and had dismounted to stalk, leading my put house by the bridle. My eyes were on a small chappare bush ahead, when suddenly Alazan snorted and reared backward so violently as almost to unhave walked upon my death.

The only thing visible was a truy ob-

beetle—merely a head and perhaps an inch of neck. But it was the most frightful object in its kind that I had ever seen. The head, certainly neither so broad not so long as my thomb mail. had a shape and an air of condensed malignity impossible to describe. It seemed the very essence of wickedness and hate, fairly bulging with deadly spite, and growing upon one until it looked reveral times its actual size The ugly triangle (which is the distinnever did he shy at a harmless snakeand the tiny borns, which added a per-rulim and grotesque hideousness, lett no doubt that this was a pichu-cuate lie had buried himself most to the head in the gray sand, against which his unper slon was barely distinguishable, and hus in ambush was waiting for some-

thing to turn up.

Tairing Alazan loose, I knell at the safe distance of a yard to study the litto it, but at last, evidently discorning ests is necessary. Doubtless some of the that the blane lay back of the switch, actually followed it up, and with such actually followed it up, and with such they may or may not have been a matter. agiluy that I had to nump up and back without less of time. The idea of 10- But it should be remarked that treat never seemed to enter that flat Chicago adderman is the keenest ob head. Sometimes he would lie and puff server of public opinion and the shrewdout with impotent rage, throwing his est judge of its trend, which means mouth so vale open that it seemed the that when the 62 aidermen who were when so that open that it when the present in conneil Monday night unani-glided toward me, his head an inch

above the ground, with an attitude which seemed to say, "Stand still there, and we'll see who laughs." At last I killed him. He was neither larger round nor longer than an ordinary lead peneri; a cold, leaden gray naty tend penerij a cond cadan sady on the back, but underneath rosy as the mouth of a conch shell. The fangs were tiny, not much more than an eighth of rect.—Chicago Times. The state, represented by Attorney Morrison, asked a special vonire, arguing that the trial was not strictly criminal. For the defense the argument was made that the regular vonire should be exhausted before a special one was summoned. After lengthy arguments Judge Paine decided that the regular venire should be exhausted, after which a special would be ordered. The work of securing a jury was then begun. Prendergast, who was present, made one of his rambling speeches, and acknowledges arriving on the White Stew Stemsley and one of his rambling speeches, and acknowledges.

animal that walks.

When the hunt was over, I told my Indian claims of the pichu-cuate and asked them many questions. They all knew of the snake, though several had its health and activity. The fur is perfectly white and very long. In spite of knew of the snake, though several had its mature are milk is still its favorite feelly white and very long. nover seen one, and all agreed that it is food.—London Graphic.

The southwest is more liberally supposed by the governments of those plied with venomous things than any countries, are innumerable, and every other area in the Union. In the burning deserts, in the inhabited but arid man life at a rate that appals the imaging deserts, in the inhabited but arid man life at a rate that appals the imag expanses of New Mexico and Arizona, mation. The most intense and theatric expanses of New Mexico and Arizona, the rattle-nake abounds, and in several varieties, including the strange and deadly "side-winder," Crotolus cerastics. The so called tarantula--really only a gigantic bush spider, but none the less dangerous because of the missionner—is decidedly common. Scorpions are none too rare in the southern portions of the turitories, and in all parts contropts tria has a machine contropt than a machine control to the control of the turitories, and in all parts controls. too area in the southern portions of the tanto of 255 miles from the rifle. Austractives, and in all parts centipeds of 7 to 8 inches long, are frequent and neighborly. But the chief distinction of the right of the right of the right can be a single gentleman with a wavel must be the right of the right can be a set of the right since of the picha-caute, the deadliest tache and a monocle in his left eye, who snake in North America.

highly turns a crank. At least this is the condition of things according to the serpent of India. Not only the most latest illustrated journals at hand. The highly venomous, but the eniest and man with the eyeglass can turn the most treacherous, he would be also the 40,000 mon into eternity during the luncheon hour.
Incidentally a German tailor has in-

vented a coat that makes the wearer absolutely indifferent to bullets at any range, and the Italians have machines for throwing very small and almost in-visible torpedoes a distance of nearly a which was breagnt up to our territory by the Spanish conquerors.

My first meeting with one was in Valencia county, N. M., in June, 1890, on the sandy flanks of the Cerro del with force enough to kill 100 or more solders if they have not known to be in the yield. soldiers if they happen to be in the vicinity. Great numbers of them can be thrown at a time, and a pleasing and cheerful feature of it is that there are no disagreeable odors nor any smoke whatever when the explosion occurs. M. Turpin of France is the latest hero

prise, for Alazan was too good a horse to mind triffes. As there was nothing to be seen, I started to pull him forward. Again he protested and with evident terror, and chancing to look at we will be seen. terror, and chancing to look at my very fitted 1 understood his fear and felt This machine is operated by electricity, and, according to its inventor, it is of than mine, for in another step I should so terrible a nature that it will do away with all fortifications throughout the civilized world. This is merely a detail ject, not nearly so large as a good stag of the execution which this machine is expected to accomplish. Forts will be of nouse, because M. Turpin's machine would rend them all into atoms, and at a distance of soveral miles a man can mow down the enemy at the rate of 20,000 at an engagement. The facts are inspiring, but there is a lack of detail about them which is in accordance with much, of the literature which has lately been put forth by the various Mun-chausens among the war officers of Eurons. The Turnin invention so far out and unity triangle (which is the distinguishing back of all various stakes, strips everything else, according to the being formed by the poison gland back ortics of modern warfare, that it will of each eye) told me at once that Alagan was keeping up his reputation—alone is enough to devastate a country. insure universal peace. One machine alone is enough to devastate a country.

To flave Drowning People.

essity for every burnin creature to learn to swim has been emphasized till the world is weary of hearing it yet almost every day there is news that hapless mortals have lost their lives through not knowing how to keen there heads above Next to being able to swim, the most important thing in commiction with accidents on the water is to be able to rescue from drowning somebody who cannot swim. The following directions for this contain useful hints

for this contain useful hints. It is essential that the man in the water be reached as speedily as possible. Therefore a rapid plur ge into the water nearest him would be the first thing in do. It is better to run along the shore of a river to a point above where the man is fa order to have the assistance of the current in reaching him, thus as inc, your strongth which will be needed later. Be sure to approach him from behind, grabbing him in such a manner that your left hand, which passes under his left arm may grasp his right wrist firmly and press him firmly indward you. Then swim toward the shore upon your back being careful to make use of the current all you can. The right hand is hapt suitledy free and can be used in swim.

ming. Only the faces of the two will be visible above the water and both bodis will be carried true by the water (according to the specific weight) the rescuer having the task of moving forward. The rescuer cannot be arresped by the one rescued as the inter-cannot turn to the right because his wrist is firmly held, nor can be turn to the left, because then the rescuer would put it if it shoulder closer to his own if the first atter, it to grasp the drowning man be not successful try it again. The objection that if a drowning, man grasp you it is impossible to shake him. If le groundless. The man drowning will slungs try to keep his head. that it a drown, a fine grand part is ampos-sible to shake him if he groundless. The man drowning will pluage try to keep his head above water. Therefore all the rescuer has to do is to dive or her the water and the man will immediately 1 t.o. The method is advocated by the heading, swimming, sooledies everywhere, and it has been sen ed that except in extraor dinary oran tances one cannot drown so long as he'r tains his presence of mind and is occupied with the neesso only. Let userybody remarks that to save a fellow being from drowning depends in every case not so much on the rescuer sakill as a win ner as on his contheaded his vanil quickness of action.

SMALL BULLET WOUNDS. The Deadly Effects of Modern Projectile

Upon the Bunan Body. The celebrated English surgeon, Professer Victor Horsley read a very in teresting paper b fore the Royal instr-tution on the case t of modern small projectiles. In the course of his remarks he said Some prophe seem to think that a small bullet at a very kigh speed that a small bullet at a very high speed will piece the tissues of the holy with out doing much give it damage. This, however is crioneous. The bullet harries forward with it publies of the substite through which it is passing, and thus practically becomes a larger projectic. It a bullet be fired through a book it cuts out dishes of increasing diameter as it is used the major. diameter as it trivelses the payer Hence, too, it is plun that the greater the sectional weathe greater the dam and its officets if indeed it has env

may be safely negle ted
The physical constitution of a body has a most important bearing upon the behavior of a bullet entering it does a bullet of certain size and travel gets twice as much done it ing it a cutam rate simply perforate some substrucce such as wood or non, while in others, such as clay, brun, etc, it overcises a bursting and disrup-tive action? The answer is quite sum-ple, the destructive effects vary direct

that the energy of the moving projectile being impacted to the particles of water caused the dispersion of these in a hydro dyr unic fishion This suggestion was shown to be con
